GLOBAL SOLUTIONS INSTITUTE

The GSI Fulbright Initiative

and the Global Deployment System

THE GSI FULBRIGHT INITIATIVE

The Global Solutions Institute Fulbright Initiative seeks to identify, organize and mobilize many Fulbright Scholar Alumni around the world to become involved in accelerating deployment of problem solving technologies and other solutions in their respective countries.

The Global Deployment System consists of four Registries under development

1

Registry of Solutions

2

Registry of Deployment Finance Sources

3

Registry of Those Seeking Solutions

4

Registry of Deployment Accelerators

including Trade Associations and GSI Fulbright Committees

DTG2

The Global Deployment System also includes the Digital Transformation Global Goals (DTG2) to accelerate the deployment domestically and globally of problem solving technologies and other solutions involving AI and related infrastructure.

FULBRIGHT CONFERENCE

“From Innovation to Impact – Scaling Solutions to Global Challenges”

DTG2 was discussed at the recent Wharton Innovation Summit and in our recent Global Solutions Fulbright Initiative Panel at the Fulbright Conference last month.

The Panel included Fulbright Executive Director Tammy Hettinger, General John Wharton, Dr. Al Watkins and UN Treasurer Carlos Perrone.

CONGRESS

The importance of our GSI Initiatives

Below are some of the statements made by various Congressional Chairmen about the importance of our GSI Initiatives as outlined in a previous Global Solutions Summit.

We are also now working with a new Bi-Partisan Congressional International Exchange (“Fulbright”) Caucus led by Senator Cory Booker and Senator John Boozman involving many Senators and Congressmen of both parties from around the country.

REMARKS FROM SENATOR JOHN BOOZMAN

> “I also want to recognize the Global Solutions Institute Fulbright Initiative. For decades, the United States has invested in the Fulbright Program, producing more than 400,000 alumni worldwide—many of whom are leaders in government, education and business. This Initiative offers a new and meaningful way for Fulbright alumni to make a global impact. Through GSI Fulbright committees in 165 countries, and access to state-of-the-art information systems, this network will enable stronger connections and faster deployment of problem-solving technologies and solutions.”

Senator John Boozman
of the US Senate Committee on Agriculture, Nutrition and Forestry

REMARKS FROM CONGRESSMAN FRENCH HILL

> “For more than eight decades, the United States has made a multibillion-dollar investment in the Fulbright Scholarship Program—an investment that has strengthened global partnerships, expanded knowledge exchange, and elevated American leadership around the world. The Global Solutions Institute Fulbright Initiative builds on that legacy by helping companies, nonprofits, and innovators bring proven technologies and solutions to more people and more markets—more quickly and more effectively. This work is focused on practical real-world solutions to some of the most significant global challenges we face today, including energy and water, the environment, healthcare, public policy, and food systems.”

Congressman French Hill
of the US House of Representatives Committee on Financial Services

> “Ultimately, the GSI Fulbright Initiative strengthens the return on America’s Fulbright investment by accelerating the global deployment of solutions that work. In addition, initiatives like this have the potential to attract increased foreign direct investment into the United States by helping companies that invest here expand into other countries through the GSI Fulbright Network.”

Congressman French Hill
of the US House of Representatives Committee on Financial Services

REMARKS FROM CONGRESSMAN RICK CRAWFORD

> “I am especially pleased to see the Global Solutions Institute Fulbright Initiative highlighted during this summit. The United States has invested billions of dollars in the Fulbright Scholar Program, which has produced more than 400,000 scholars recognized worldwide for their excellence. Throughout my travels with colleagues in Congress, I have often met ministers and leaders who are proud Fulbright alumni. Through this initiative, Fulbright alumni will have the opportunity to give back by contributing to problem-solving efforts with global impact. Across 165 countries, Fulbright committees will be equipped with state-of-the-art systems to support a global deployment network—sharing ideas and technologies developed by universities, companies, NGOs, and other problem-solving organizations. These efforts will allow solutions to reach more people, faster than ever before. Additionally, landing pads in the United States will help track direct foreign investment and serve as launching points into other international markets.”

Congressman Rick Crawford

Chair of the US House Permanent Select Committee on Intelligence and Member of the House Committee on Agriculture

The mission

... help GSI fulfill the mission outlined by the more than 115 former Presidents and Prime Ministers of the Club de Madrid and the P80 Group (initially created by King Charles) to help accelerate the deployment of problem solving technologies and other solutions globally.

Visit: www.globalsinstitute.org ↗ **Visit: Club de Madrid ↗**

GSI Fulbright Committees in more than 160 countries

... our plans to work with partners like the Fulbright Association (www.fulbright.org), the Department of State and others to establish GSI Fulbright Committees in more than 160 countries around the world to assist with the deployment of problem solving technologies and other solutions.

The members of these Committees will help assess the need for the solutions in their respective countries and also help find the best deployment partners in the countries.

Eager to “give back”

We know that there are many Fulbright Scholar Alumni in leadership positions in government, business, NGOs, Academic and other institutions in many countries around the world. All of them received advanced degrees in the USA and returned to their respective countries. Many are eager to “give back” by becoming involved in the GSI Fulbright Initiative.

GSI has conducted very productive meetings with numerous folks who seem to understand the benefits to the World of a fully implemented GSI Fulbright Initiative involving many of the more than 300,000 Fulbright Scholar alumni in more than 160 countries.

Now making this possible

The United States has made a major multi-billion dollar investment in the Fulbright Scholar Program over the years but the Fulbright Scholar Alumni have never been given the opportunity in an organized manner to “give back” by assisting with the deployment of problem solving solutions globally.

The GSI Fulbright Initiative is now making this possible.

A state of the art IT/AI System

The GSI Fulbright Committees are to be connected with a state of the art IT/AI System to power their connections and work as part of a Global Deployment System which helps companies, NGOs and others with problem solving technologies and other solutions reach as many people and markets as possible as quickly as possible.

A measurable “return on this Fulbright investment”

The GSI Fulbright Initiative is the path forward to help the USA achieve a measurable “return on this Fulbright investment” already made. GSI Fulbright will do this by helping companies with technologies and other solutions more rapidly generate more sales/revenue by accelerating deployment and also attract more foreign direct investment (FDI) into the USA.

FDI Landing Pads in USA become Launching Pads into other countries using GSI Fulbright.

GLOBAL SOLUTIONS INSTITUTE

Accelerating deployment of problem solving technologies and other solutions.
